INFORMATION DISCLOSURE STATEMENT

Honorable Commissioner of Patents and Trademarks
Washington, DC 20231

RECEIVED
DEC 12 2002
GROUP 3600

Sir:

The accompanying form PTO-1449 lists one or more documents which may be considered material to the examination of this application. A copy of each document is provided, if available.

This application is one of seven filed on the same day, which have some text and drawings in common, but which are not necessarily related. The attached Form 1449 lists all items which have been cited in any of the seven corresponding PCT search reports, and also lists items cited in the search report on yet another commonly-owned application which also lists inventor Roger Schultz. Note that these cross-citations do not indicate that the cases are related, but are submitted merely to ensure that the Examiners are aware of the other cases. The undersigned attorney has not examined these citations sufficiently to form any independent views on the relevance of any particular citation to any particular case.

Applicant reserves the right to establish the patentability of the claimed invention over any of the listed documents should they be applied thereagainst as references, and/or to prove that some of these documents

may not be prior art, may not be within an analogous field of art, and/or may not be enabling for the teachings they purport to offer.

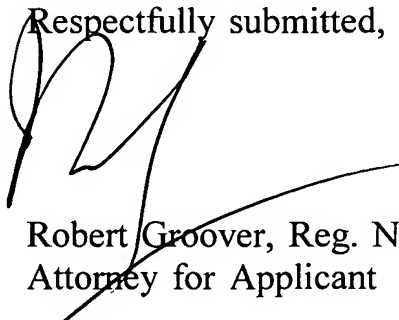

This statement should not be construed as a representation that an exhaustive search has been made, nor that more material information does not exist.

The Examiner is specifically requested to conduct an independent and thorough review of the documents, and to form his own opinions as to the significance of those documents to patentability of the claimed inventions, regardless of any of the foregoing statements concerning the significance of the references. The foregoing statements are made in good faith, and in compliance with the duty of disclosure; but they cannot substitute for the Examiner's specialized expertise, nor are they intended to derogate from the Examiner's official duty to assess patentability.

It is also respectfully noted that the submission of this material is not intended to displace the Examiner's professional ability and duty to search. Indeed, the Examiner is specifically requested not to rely on the materials submitted herewith, but to conduct a full and independent search.

It is respectfully requested that the Examiner initial and return a copy of the enclosed PTO-1449, to indicate in the file of this patent application that the documents have been considered.

Respectfully submitted,

Robert Groover, Reg. No. 30,059
Attorney for Applicant
